Fresh from her instantly sold-out intimate *Before the Bloom* comeback shows across London and New York, **Maisie Peters** has shared another taste of her soon-to-be-announced third studio album with *Say My Name In Your Sleep*, the first of two collaborations between Peters and 2X Grammy winner **Marcus Mumford**. Listen [HERE](#).

Handpicked as **Zane Lowe's New Music Daily** track of the day, “Say My Name In Your Sleep” is built on delicate fingerpicked guitar and loosely inspired by Daphne du Maurier’s 1938 Gothic novel *Rebecca*. Contemplating love’s lasting imprint, its push and pull between past and future underpins one of the album’s central arcs: how the right love helps you heal from the wrong one.

“*Say My Name In Your Sleep*’ is a song about both haunting and being haunted,” explains Maisie. “It’s about keeping a constant eye on the past - on the person you loved - whilst

*being old enough and grown enough to know it wasn't right, and to wish them all the best. It's about having a tiny, secret sliver of your heart that still, deep down, hopes and prays they think of you - just a little, just when it's dark, just when they hear that song on the radio. It's about letting go, begrudgingly, but letting your shadow linger a moment too long."*

Maisie continues: *"It was one of the first songs Marcus and I wrote together in Real World Studios in deep winter - there was something magical and spooky in the air there, and I think it definitely got translated into this song."*

Stay tuned for more Maisie news soon.
